

Director's Report
For Report: July 9, 2014
Department of Recreation

Everything at the pool has been running quite smoothly. We had a few mishaps here and there between leaks and inspections, but as of now everything is working properly.

-Chlorine pumps

Installed and pools are working at 100%.

-Electric Approval

Health department did not pass the pump house for electrical inspection. After consulting two electricians we found that the code does not require an emergency stop on the main pool. We were still within the proper code so the inspectors passed us and the health department has been updated on our status.

-Kick boxing Classes

Classes started Monday. Flyers have been placed at the pool to raise awareness about the fitness class. Hopefully we can garner more and more participants.

-Aqua Zumba Classes

Zumba classes started and we have had around 10 participants each class.

-Open Swims

The open swim program with the high school coach started this week. Non-members are being charged the twilight rate as previously agreed upon.
